# 1. Introduction

Our goal is to make Assurety products, services, and supporting documentation accessible, with good quality. To that end, our documentation includes features that make information available to all sorts of users. This documentation is available in pdf format, and contains markup to facilitate the access. Standards will continue to evolve over time, and Assurety is actively engaged with other market-leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers.

This is an upgrade release with some significant enhancements. Users of previous releases are encouraged to upgrade. The information in these Release Notes is current as of the release date. For the most current information, please contact our technical support center at: [SA-SUPPORT@assuretyconsulting.com](mailto:SA-SUPPORT@assuretyconsulting.com).

Assurety recommends you also review the Software User Guide and Installation guide before installing the software.

## 2. What's New

No.	Type	ID	Description
<b>BUSINESS / FUNCTIONAL</b>			
1.	Change	4869	<b><u>Support for Mail.dat 11-2 and 12-1</u></b> <ul style="list-style-type: none"> <li>ShipmentAssurety now supports scheduling with Mail.Dat version 11-2 and 12-1 Jobs.</li> </ul>

### 3. Major Fixes

No.	Description

## 4. Known Bugs/ Limitations

No.	Type	ID	Description
1.	Limitation	1718	<u>Auto Scheduling Settings</u> For Web methods and Flat Files, SA can be triggered only using PGI field and not by using CGI Field.
2.	Limitation	1665	<u>Cancel and Create appointment</u> "Transfer all content "feature is not working.
3.	Limitation	1713	<u>Business Partners Standalone</u> Once Business partners standalone content is rejected by FAST then SA does not consider them as available/free content.
4.	Limitation	1449	<u>Partner appointment – Content association</u> SA cannot associate multiple contents with individual Partner Consignee Appointment ID, at a time.
5.	Limitation	1695 1620	<u>Multi-stop appointment</u> Travelling time calculation between to consecutive stops of a Multistop chaing is not working in case of Frejected/No Slots/ Tracking/ Redirection.
6.	Limitation	1720	<u>Multi-stop Appointment(User Interface)</u> Maximum time span settings for "Multi Stop scenario" via GUI are not functional.
7.	Bug	1636	<u>Multi-stop appointment (User Interface) – All Pallet Settings</u> "Create One Content ID for all containers with the Same locale key and have Same In-home / Issue/ Induction Date as an 8125 shipment group" Option is not working.
8.	Bug	1719	<u>Auto Scheduling</u> The check "Do you want truck or dispatch number value to take higher priority than trailer default weight limit?" is not functional and the weight limits defined on the Default trailor Settings screen will supersede this check.

9.	limitation	348	<u>Message Management</u> In "All Pallet" case, if multiple bedload containers exist for one appointment, then only the information of first bedload container will be sent in one request.
10.	Limitation	353	<u>Insert/Update Container</u> In-home End date is not available on screen therefore user cannot update In-home End date via Container screen.
11.	Bug	357	<u>Partner Appointment Query</u> When user receives Tracking in response of a Query then Tracking service is not working. But user has the option to requery the Partner's Appointment query for the same appointment.
12.	Bug	373	<u>Google Chrome</u> Page layout / control appearance is not proper in google chrome.
13.	Limitation	5496	<u>Mail.dat 11-2 and 12-1 with Mail.XML 8.0</u> Application is supporting scheduling with Mail.dat 11-2 and 12-1. Since ShipmentAssurety is Mail.XML 8.0 compliance so only the Mail.dat 11-2 and 12-1 container level values that are support by Mail.XML 8.0 are being supported and the values that are not being supported by Mail.XML 8.0 are not supported by SA 8.8.
